### **Radio Ruido** *False Rosetta* FREE103POINT9

2x7" Radio Rudio is the operational name used by Tom Mulligan for various projects, both solo and collaborative. Here, he presents a project inspired by shortwave radio's 'numbers stations' – mysterious generators of spoken, seemingly random numbers or word sequences, which have no officially acknowledged origin. There are several approaches taken to the material, but all of them seem to be structured in ways that suggests malevolent intent hidden among the placid sounding rows of figures.
