Regrant Partnership Report 2009-2018

**Support to New York State Media Arts Organizations
and Media Artists**

Report Date December 2019

NYSCA Electronic Media & Film in partnership with Wave Farm: Media Arts Assistance Fund (MAAF) supports electronic media and film artists in all regions of New York State. The Fund provides unique and critical support with a focus on sustainability and public engagement.

**Council on
the Arts**

Introduction

Electronic media and film are among the most dynamic art forms of our time, and the NYSCA Electronic Media & Film Program (EMF) has long supported technology as a creative practice.

This report, through the lens of EMF regrant, offers a wealth of statistical information on independent media art activity and practice in New York State. From tools and techniques to new genres, the Regrant Partnership Report 2009-2018 captures the emerging fields of technology over the past ten years. For researchers, historians, funders and the field, this report provides rich ground for study. For the public, this report offers potential futures, illustrating the multiplicity of approach and exploration of the media arts as we enter 2020.

Through its annual grantmaking since the 1970s, EMF has fostered media arts organizations and individual artists working with technology. EMF Regrant Support was designed to complement annual funding by providing smaller quick-turnaround grants in a timely and responsive manner, year-round.

Regrants have served the media arts field for over thirty years. By responding to needs of the field as technology continually evolves, Regrant Support too has evolved, remaining viable and receptive to change.

NYSCA EMF Regrant Partners:

Experimental Television Center (1988 - 2011)

Independent Filmmaker Project, formerly known as Independent Feature Project (2005 - 2008)

Arts Council of the Southern Finger Lakes (2012 - 2017)

Wave Farm, formerly known as free103point9 (2008 - Present)

Through succeeding generations, NYSCA has supported the media arts field from television to film to video to new technologies and new practices. 2000-2010 saw the emergence of sound art and game design. Analog media art practices endured, along with heightened activity in digital arts and the Internet. Since 2010, new developments have propelled digital media into new frontiers – beyond virtual – of Art, Science and Technology.

It is a responsive approach in funding, to emerging fields, that has kept Regrants an important and timely resource throughout. To remain relevant, a periodic review of where we are, where we've been, and where Regrants might need to go is essential.

In 2008, EMF invited Wave Farm, known then as free103point9, to become the next generation Regrant Partner, taking over for Independent Feature Project (IFP), as known then, who served as the administrator of the Distribution Grant for New York State Artists from 2005 through 2008. Earlier that year, NYSCA EMF engaged Sklar Media to conduct a grant assessment and identify criteria for a new regrant partnership. This in-depth evaluation of both NYSCA Electronic Media and Film regrant programs and potential partners included a day-long focus group with professionals in the field. Artists, exhibitors, distributors, libraries, and funders were all key participants in the discussion. The ambitious goal was to ensure that the Distribution Grant was serving the complex and diverse needs of today's media arts community at-large.

Ten years later, the NYSCA EMF & Wave Farm Regrant Partnership is now the multi-faceted Media Arts Assistance Fund, which serves both contemporary and established artists and organizations. Reflecting on the last decade and looking ahead to the next, leads us to this Report. The year 2020 offers an irresistible moment to exercise vision. This EMF Regrant Partnership Report 2009-2018 is a statistical survey of MAAF funding activity, through small grants, over the past decade. We are taking stock of supply and demand, gathering data, and analyzing how the future might look through the lens of new artist populations in a 21c environment. What is new and what remains the same, is an important question that has always guided NYSCA support for the Media Arts.

Perspective - Experimental Television Center & Wave Farm

On looking back over a significant history of regrant support for technology as an art form, EMF asked the Experimental Television Center and Wave Farm to comment on their experience in working with the media arts field as administrators of EMF Regrants. The following offers a view of then and now.

The Experimental Television Center - Regrant Partner 1988-2011

In 1988 NYSCA selected the Experimental Television Center to administer the Electronic Arts Regrant Program; Finishing Funds provided completion grants for individual artists and Presentation Funds supplied artists' fees for exhibition. In 1998 the program expanded to include Technical Assistance (TA) support for organizational development. During our tenure, ETC was fortunate to collaborate with many media organizations as they continued to manage long-term systemic problems--organizational capacity, board development, outreach and communication--as well as to address many new challenges. Technological innovation was probably the most significant, particularly since the TA program appeared at a time when digital connectivity and the new media revolution exploded.

The evolution of technology created cultural disruptions presenting significant challenges to arts communities. Possessing modest financial resources, many groups required nimble and responsive support to help them identify and address strategies for addressing these new concerns. Further, TA support had to acknowledge the State's important geographic, cultural and social differences; constituents ranged from the very rural to the greater NYC area. TA responded to a multitude of individual needs from groups with widely varying resources.

Technology's constant advance created challenges interwoven into the very fabric of the media arts--involving the means of creating media, with implications for production, exhibition and distribution and for preservation, as well as methods of information sharing collecting, storing, accessing and promoting. Through support for conferences and convenings, TA also helped media arts upstate and downstate with opportunities for collaboration and the exchange of ideas and information.

Sherry Hocking, Executive Director, Experimental Television Center (1969 to 2011)

Wave Farm - Regrant Partner 2009-Present

In the fall of 2008, Wave Farm (formerly known as free103point9) became NYSCA EMF's newest regrant partner, administering the Distribution Grant for New York State Artists. A primary goal at that time was to broaden the grant's reach across the multiplicity of practices within the media arts genre. Historically, the Distribution Grant primarily supported conventional distribution needs for artists working in independent film and video. Under Wave Farm, the opportunity was promoted as support for distribution and exhibition of new works in a broader definition of media art including film, video, sound, new media, and media installation. Grant awards assisted artists in making works available to public audiences by supporting duplication of previews, screening, and exhibition copies of moving image and sound works, the rental or purchase of equipment for exhibition/distribution by individual artists, and promotional materials including documentation and schematics of media installation and new-media works. A mentorship component was also included pairing grantees with experts in the media arts field who offered guidance throughout the grant period.

In 2012, taking over for Experimental Television Center, Wave Farm began administering Technical Assistance (TA) to organizations, providing critical funds for media arts organizations to benefit from the expertise of outside consultants. Operating on a quarterly application basis, the TA program continued to provide agile, timely, and responsive support in the rapidly evolving field of technology as an art form.

The Media Arts Assistance Fund (MAAF), was established two years later, in 2014, when the New York Media Arts Map, originally launched in 2009, was added to the NYSCA EMF and Wave Farm Regrant Partnership portfolio. The Media Arts Map was an online resource that identified media arts organizations throughout the state, tracked funding opportunities, and aggregated discussion lists, convening, and other networking opportunities. Under the umbrella of MAAF, Wave Farm continued the administration of the Distribution/Exhibition Grant to individual artists, as well as Organizational and Professional Development, and Conferences and Convening to organizations.

In 2018, as the NYSCA EMF and Wave Farm Regrant Partnership marked a decade of activity, we took a six-month period to assess and evaluate the opportunities being offered in relation to the contemporary needs of the field. This report documents a considerable piece of this assessment and analysis. Our takeaways, as informed by the last ten years of applicant statistics and trends, and a 2018 survey of the organizations and artists that comprise the New York State media arts, informed a newly expanded Media Arts Assistance Fund Regrant Partnership that now offers two distinct individual artist opportunities and five tracks of support for organizations. The New York Media Arts Map v3, newly redesigned and relaunching in conjunction with this report, will serve as a dynamic portfolio of the art and technology projects and activity throughout New York State supported by NYSCA Electronic Media & Film and its regrant partnership with Wave Farm: The Media Arts Assistance Fund.

It has been, and continues to be, both a pleasure and a privilege to work closely with NYSCA EMF and to be a part of a dedicated and robust effort to support the dynamic needs of media artists and organizations in New York State.

Galen Joseph-Hunter, Wave Farm Executive Director (2002 to present)

Thank You

With this introduction and report, the Electronic Media & Film Program hopes to provide a useful snapshot of the rich history of NYSCA EMF Regrant Support to individual media artists and organizations, and the importance of regrants to the ever-developing field of art and technology.

As NYSCA EMF Program Director from 2000 to present, I can attest to the outstanding (and tireless) administration of media art organizations that have assisted the EMF Regrant Program over these many years. EMF gratefully acknowledges the Experimental Television Center, Independent Filmmaker Project, The Arts Council of the Southern Finger Lakes, and Wave Farm.

EMF would also like to recognize Rhizome and American Documentary / POV for their role in hosting the early development of the NY Media Arts Map, today a project of the EMF / Wave Farm Regrant Partnership.

In closing, EMF would like to thank the New York State Council on the Arts for its ongoing support of technology as an art form and the media arts field for its pioneering exploration and preservation of this ground-breaking work.

Executive Summary

To understand the field today, EMF and Wave Farm questioned how MAAF grantees may or may not have changed artistic practice between 2009 and 2018 by reviewing MAAF support for Artists and MAAF support for Organizations.

A series of fundamental inquiries drove the survey process in an effort to determine: What are the funding patterns of technical assistance since 2009? Does today's MAAF funding reflect artist activity in keeping with new media opportunities? What new form of support might be needed to meet expanding frontiers in emerging fields, and what do we see as viable support for artists as new genres of Art and Technology continue to evolve?

Primary Findings of the Survey 2009 - 2018

- 1) Overall the Survey found that MAAF requests for support among applicant organizations and individual artists remained consistent in regard to the areas of support most needed.
- 2) The Survey also demonstrated that MAAF Funding remains relevant through small grants that effectively complement annual NYSCA EMF grantmaking to organizations.
- 3) Responsive Support through small grants in a quick turnaround application process in a dynamic environment is critical.

Two new areas of activity were observed:

- For organizations, MAAF saw a rise in artist collectives seeking advice on forming non-profit corporations, and a rise in new media 501c3 entities.
- For artists, MAAF also saw an increasing relationship between distribution and exhibition requests, where the vehicle for reaching audiences and the viewing environment were increasingly linked by technology requirements for both.

The Survey demonstrated that MAAF Funding remains relevant through small grants that effectively complement annual NYSCA EMF grantmaking to organizations.

By being relevant and effective small grants provide:

- Quick turn-around support
- Responsive support to unanticipated events as opportunities arise
- Essential support for professional and organizational development opportunities
- Flexible support in meeting the needs of a dynamic field

Regrant Administration

Early in the survey planning process, NYSCA discovered a redundancy in the application system regarding Presentation Funds. Because Presentation Funds were already in place through annual EMF Exhibition support, this fund was considered non-essential. However, the need for Finishing Funds (completion of artists' new work) remained a question.

To help ascertain the need for Finishing Funds, a survey of grantees (individual artists) throughout upstate New York was conducted by the Arts Council of the Southern Finger Lakes (The Arts Council), NYSCA EMF Presentation and Finishing Funds Regrant administrator from 2012-2017. The survey found that:

- 50% of 61 artists responding were between the ages of 26 and 55
- 56% replied that it was difficult to identify funding resources for their work
- 67% said they supplement their project costs with personal funds

Artists responded by underscoring the critical impact of this Fund, as it helped to push new work to completion, distribution and public presentation through small grants.

As the relationship between completion of new work, distribution and exhibition became more apparent, EMF and Wave Farm reshaped MAAF support for individual artists to include both opportunities:

- Completion Support for New Work (formerly Finishing Funds)
- Distribution/Exhibition Support for New Work

The Media Arts in a 21c Environment

Moving Forward

What do we see as viable support for artists and organizations as new genres of Art and Technology continue to evolve?

Responsive Support - small grants though a quick-turnaround application process in a dynamic environment is critical.

MAAF small grant support for unanticipated events as opportunities arise, on a quarterly basis, that compliments annual support of larger grantmaking, is essential. Professional development to meet the challenges of technology and sustainability in a world of expanding opportunities is critical. And, individual artists often need direct small grants for completion of new work and getting that new work out to the public.

With this survey, EMF confidently moves forward with the Media Arts Assistance Fund as a relevant and essential Regrant. MAAF serves the public through support for individual artists and organizations, providing resources that build capacity in working with technology as an art form.

Media Arts Assistance Fund 2020

Informed by the natural evolution of the field and technology developments as analyzed in this report, the Media Arts Assistance Fund today includes distinct and expanded opportunities for serving organizations and individual artists, as well as the NY Media Arts Map (The MAP).

MAAF for ORGANIZATIONS

For organizations, NYSCA Electronic Media & Film in Partnership with Wave Farm: Media Arts Assistance Fund (MAAF) provides funds to hire outside consultants to support organizational and professional development, as well as supports peer-to-peer mentoring and convening and conference attendance. Eligible organizations have missions specific to the media arts, dedicate the majority of their programming to technology as an art form, and are current NYSCA grantees. While priority is given to NYSCA Electronic Media and Film grantees, applications from multi-disciplinary organizations, which incorporate technology as an art form are also considered.

MAAF Application Categories for Organizational Support

- Emerging Organizations Scholarship (new)
- Conferences and Convening
- Peer-to-Peer Mentoring (new)
- Organizational Development
- Professional Development

MAAF for ARTISTS

For individual artists, NYSCA Electronic Media & Film in Partnership with Wave Farm: Media Arts Assistance Fund (MAAF) provides support for the completion, as well as distribution and exhibition of works in all genres of sound and moving image art, including emergent technology. Grant awards assist artists in completing new work, reaching public audiences, and advance artistic exploration and public engagement in the media arts.

MAAF Application Categories for Artists Support

- Completion Support (formerly Finishing Funds)
- Distribution/Exhibition Support

New York Media Arts Map (The MAP) <http://nymediaartsmap.org/>

Designed for cultural organizations, artists, and the general public, The MAP is a vital resource identifying art and technology projects and activity throughout New York State supported by NYSCA Electronic Media & Film and its regrant partnership with Wave Farm: The Media Arts Assistance Fund. Originally launched in 2009, by 2014 The MAP had approximately 150 unique organizations. In 2019 The MAP expanded to include 197 an increase of more than 30 percent over the past five years. In conjunction with a MAP v3 redesign, launched in 2019, 67 individual artist MAAF grantees are also now featured on The MAP.

Finally, as a compliment to MAAF activities, the Art & Technology Review, a periodic online EMF communication now three years old, reaches over 1,300 individual subscribers.

SECTION FOUR

Survey

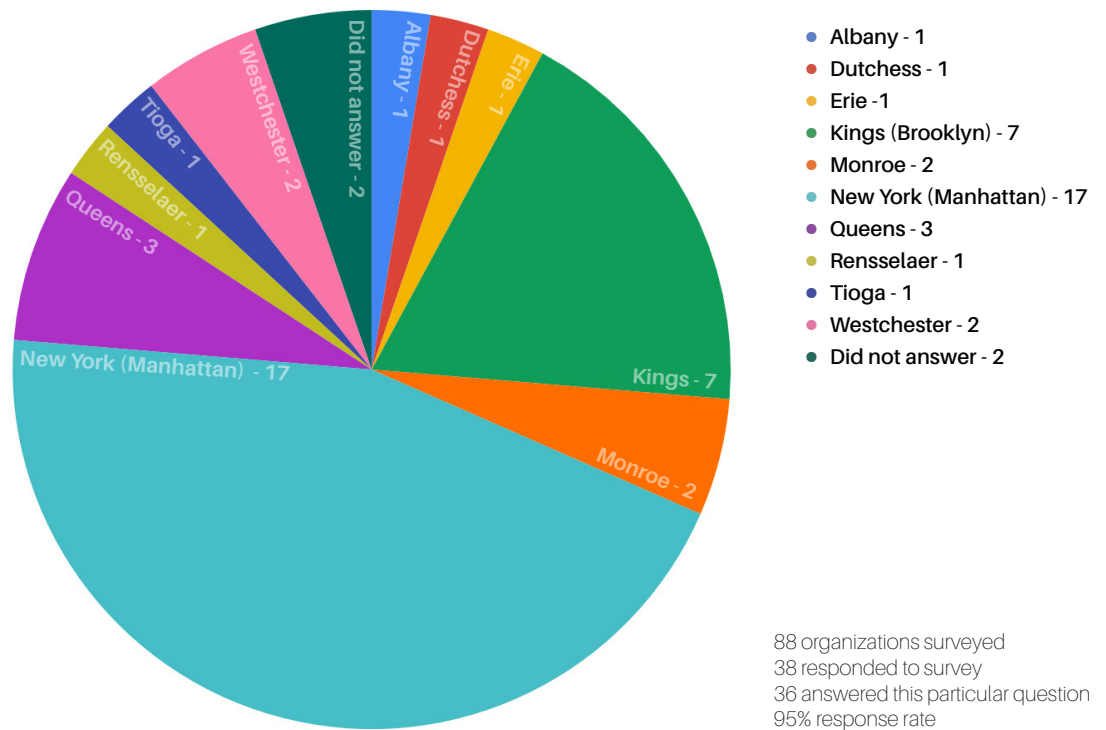

**Council on
the Arts**

MAAF Organization Grantee Survey Results

1. In what New York State County is your organization based?

2. In what decade was your organization founded?

* Other: 1929

MAAF Organization Grantee Survey Results

3. What is your annual operating budget?

4. How many full-time equivalent staff members does your organization have?

MAAF Organization Grantee Survey Results

5. Please identify your organization's public programs. (Select all that apply.)

* Other: Monthly Networking Meetings and Screenings and lectures from industry professionals, Bio Art, Research and archival activities, web site development regarding video art history, Distribution, live performance, distribution, Residencies, education programs, Critical Art and Social Practice, Music Concerts, Dance, & Theatre Performances

7. What percentage of your total annual programming is media art / technology-based?

MAAF Organization Grantee Survey Results

9. What are your primary professional development needs? (Select all that apply.)

*Other: N/A, grant writing skills, research and assessment, investment/financial management, Customer service

10. Please rank the following (Organizational Development, Professional Development, and Conferences & Convening) according to your organization's most frequent needs.

Organizational Development (Incl. Strategic Planning, Board Development, Capital Campaign Planning, etc.)

MAAF Organization Grantee Survey Results

10 (Continued). Please rank the following (Organizational Development, Professional Development, and Conferences & Convening) according to your organization's most frequent needs.

Professional Development (Incl. Staff and Board training opportunities, etc.)

Conferences and Convening (Conference attendance, Peer organization site visits and Convening, etc.)

88 organizations surveyed
38 responded to survey
34 answered this particular question
89% response rate

MAAF Organization Grantee Survey Results

11. What outside professional support does your organization regularly engage? (Select all that apply.)

*Other: Database Programming, digital marketing consultant, Speakers, teachers, lecturers, interns

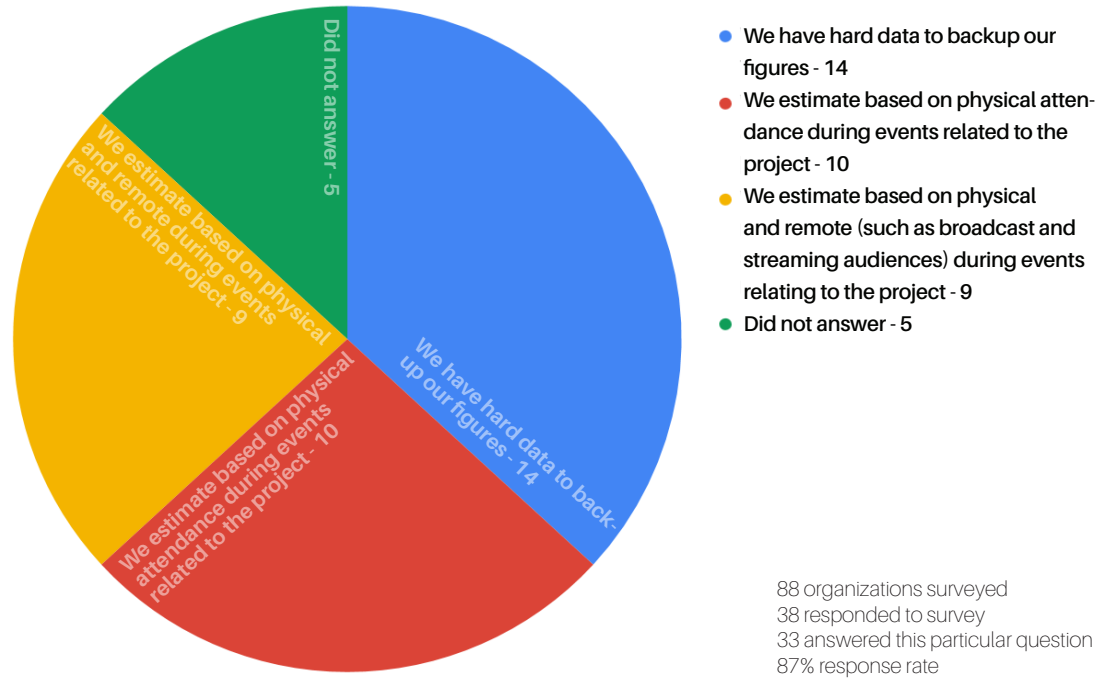

12. Describe your primary audience.

*Other: All the above, both the users and makers of media, LGBTIQ, Emerging media artists of color, Combined Peer/Professional and General Public with a focus on Queer

MAAF Organization Grantee Survey Results

13. When asked to specify the number of individuals benefitting, how do you determine your figures?

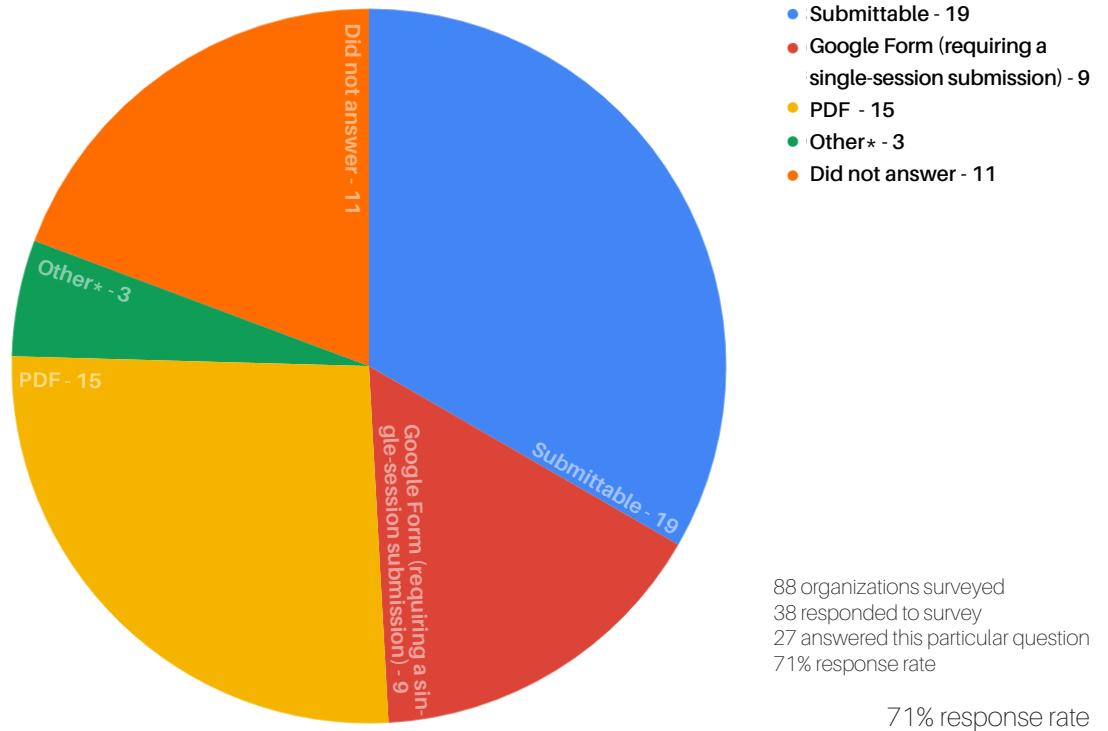

14. What applications/software do you rely most heavily on for administration, production, and presentation?

*Other: No preference, a system that allow you to save your drafts and come back to them, editable google form

MAAF Organization Grantee Survey Results

20. If a custom system is not available, what application format do you prefer when applying for funding?
(Select all that apply.)

*Other: No preference, a system that allow you to save your drafts and come back to them, editable google form

21. What type of application deadline calendar for technical assistance would be most beneficial to your organization?

MAAF Artist Grantee Survey Results

1. In what New York State County do you reside and work?

2. How would you identify your career level?

*Other: between emerging and mid-career, Late emerging

MAAF Artist Grantee Survey Results

3. Do you work primarily as an individual or in collaboration with others?

4. Please identify the primary Media Art genre in which you work.

* Other: performance, Sculpture using new technologies, decorative objects using new technologies, synchronous audio visual in performance and for installation. See addendum for comprehensive list of artist project genres.

MAAF Artist Grantee Survey Results

7. Where / through what technology do you most often present your work?

* Other: TV, Businesses, schools, live performance, Public television, and outreach screenings where I travel the work with projection equipment.

8. What audience is your work intended for?

* Other: General Public and Peer / Professional (x4), anyone tolerant of flicker and game for abstract developments, special interest (niche programs)

MAAF Artist Grantee Survey Results

14. Please rank the following (Production funding, Post-production/Finishing Funding, & Distribution/Exhibition Funding) according to your most frequent needs.

Production Funding

Post-production/Finishing Funding

89 artists surveyed
56 responded to survey
52 answered this particular question
93% response rate

MAAF Artist Grantee Survey Results

14 (continued). Please rank the following (Production funding, Post-production/Finishing Funding, & Distribution/Exhibition Funding) according to your most frequent needs.

Distribution/Exhibition Funding

- 1 - Most Frequent
- 2 - Moderately Frequent
- 3 - Least Frequent

89 artists surveyed
56 responded to survey
52 answered this particular question
93% response rate

17. What kind of support do you most need other than financial?

- Workspace / Access to technology / tools - 15
- Marketing / Promotion - 15
- Budgeting / Financial Planning / Development - 4
- Networking / Information Resources / Conferencing - 2
- Travel / Convening Support (within NYS & Outside NY) - 9
- Other* - 6
- Did not answer - 5

89 artists surveyed
56 responded to survey
51 answered this particular question
91% response rate

* Other: Exhibition connection, professional development, Representation, None, gigs, depends on project, Workspace, access to technology, Marketing/Promotion/Development

MAAF Artist Grantee Survey Results

18. What is the average budget / range of cost for producing your work?*

* Zero answers in the \$100-\$1000 range

19. If a custom system is not available, what application format do you prefer when applying for funding?
(Select all that apply.)

* Other: Google doc that can be edited across multiple sessions, really dislike pdf, it doesn't matter as long as it works
